Construction sector in the Baltic states 2017

Market analysis and development forecasts for 2017-2022

What is the content of the report?

Evaluate key components of the construction sector in each of the three Baltic states (Estonia, Latvia, Lithuania):

- **Trends** – review how recent market trends impact the market
- **Forecasts from 2017 to 2022** – examine prognoses of PMR's team of highly experienced analysts and develop your business in the Baltic region
- **Market situation** – stay updated on current **building material prices**, **wages** and **employment rates** in order to adjust your commercial offer to current demand
- **Competitive landscape** – study the companies involved in the most prestigious **construction projects**, their **plans**, and **prospects**; use this knowledge to make effective decisions

Who benefits from the analysis?

- Construction contractors conducting or initiating operations in Estonia, Latvia and Lithuania
- Business development managers and project management specialists
- Marketing and sales employees from construction machinery

Why to buy the report?

- Find out data necessary in creating business development strategy
- Study reliable forecasts useful while budgeting and planning expenses
- Monitor the market and its growth potential
- Gain essential information when creating a successful strategy for business development
- Reduce investment risk when entering a new market or engaging in mergers and acquisitions.
