PMR Ltd. Sp. z o.o., ul. Mogilska 65, 31-545 Kraków

PMR Report

- **Unique 5-year forecasts** prepared by the PMR team using a **proven and coherent methodology**
- **Expert commentary** allowing for a better **understanding of the current and future situation** and **opportunities and threats**
- Description of the main **trends and legal changes** affecting the market

Executive Summary

- An **executive summary of the report in PowerPoint** format with charts/graphs
- **Ready-to-use presentation material** for company strategy meetings

Database of report stats

- An Excel file containing all the key statistics from the report, **allowing the reader to arrange and manage the data according to their own needs**
- **A useful tool for analysts** – allows for data from the report to be easily merged with internal company data or other external data

What is the content of the report?

- Extensive analysis of the current status of the overall market and each of its main segments – residential, non-residential and civil engineering construction.
- A comprehensive range of fresh data that describes market prices, employment levels, wages, investments and various project funding scenarios
- In-depth forecasts until 2022 prepared by PMR's team of highly experienced analysts
- A long range look at the prospects for growth in the Russian construction sector

Readers will gain a comprehensive knowledge of...

- Trends – learn from expert analysis of the most significant trends in materials and equipment in addition to macroeconomic developments
- The residential construction segment – details of upcoming projects, wage and employment statistics and the number of housing units that will be ready for occupancy by 2022
- The civil engineering construction segment current and upcoming road, bridge and railway large-scale projects as well as heavy industry and environmental protection ventures

- The non-residential construction segment – companies engaged in commercial, industrial, warehouse and retail development projects in Russia
- Project funding – government programmes and other financing sources utilised for new construction projects
- Industry prices – including wages, building materials prices, investments

Market production – totals of production and assembly on the Russian market and provides forecasts for production during the period 2017-2022.

5 Reasons to choose PMR

- 1 **The solid foundation** of value and growth data for the entire market as well as for the residential, non-residential and civil engineering segments
- 2 Included **necessary data** which helps creating business development strategy
- 3 Contained **reliable forecasts for activity from 2018** and expert analysis of key drivers of growth and influences on Russia's construction industry
- 4 The report provides **descriptions of significant ongoing and upcoming projects** and examination of the competitive environment
- 5 **The publication allows** to reduce investment risk in the course of entering a new market or effecting a merger or acquisition

Who benefits from the PMR report?

- Construction contractors conducting or initiating operations in Russia;
- Manufacturers and distributors of building materials;
- Construction machinery manufacturers and distributors;
- Design and project management firms;
- Investors, analysts, banks and other professionals.
